acue and fever. OR CHILLS AND FEVER.

If the proprieter of this celebrated medicene justly claims for it a superiority over all remedies ever offered tothe public for the sufectain speedy and permanent cure of Ague and fever, or Chills and Fever whether of short or long standing. He refers to the entire Weslern and South western country whear tim testimony to the truth of the assertion that in no case whatever will it fail to cure. If the disastions are strictly followed and If the directions are stricly followed and carried out. In a great many cases a single dose has been sufficent for a cure, and whole dose has been sufficent for a cure, and whole families have been cured by a single bottle, with a perfect rectoration of the general health. It is however prudeat, and in every case more certain to cure if its use is continued in smaller doses for a week or two after the disease has been checked, more especially in difficult & longstanding cases. Usually, this modifile will not remain any nill lay keen medicine will not require any nitl to keep the bowels in good order; should the patient however, require a cathartic medicine, after having taken three or four doses of the Tonic, a single dose of Bull's Vegetable Family Fills will be sufficient.

Dr. SCHENCK advises Consump- SICKNESS PAIN AND DEATH Having for the last thirty-five years devo-ted my whole time and attention to the study

of lung diseases and consumption, I feel that I understand fully the course that ought to be pursued to restore a tolerably bad case of diseased lungs to healthy soundness. The of diseased lungs to sentity soundness. The first and most important step is for the patient to avoid taking cold, and the best of all places on this continent for this purpose in winter, is Florida, well down in the State, where the temperature is regular, and not subject to such variations as in more North-ern latitudes, Palatia is a point I can re-

commend. A good hotel is kept there by Peterman. Last winter I saw several per-sons there whose lungs had been budly diseased, but who, under the healing influence of the climate and my medicines, were getof the crimes that the ting well.

One hundred miles further down the river is a point which I would prefer to Palatka, as the temperature is more even and the air well-and the support well-and Enter-

as the temperature is more even and the air dry and bracking. Mellonville and Enterprise are located there. I should give a decided proference to Mellonville. It is two miles from river or take, and it seems almost impossible to take cold there. The tables in Florida might be better, and patients complain at times but that is a good sign, as it indicates a return or appetite, and when this is the cose they renerally increase in this is the case they generally increase in flesh, and then the lungs must heal.

Jacksonville, Hibernia, Green Cove, and many other places in various parts of Florimany other places in various parts of Fior-da, can be safely recommended to consump-tives in winter. My reasons for saying so are that patients are less liable to take cold there than where there is a less even temperature, and it is not necessary to say ture, and it is not necessary to say that where a consumptive person exposes himself to frequent colds he is certain to die shority. Therefore my advice is, go well down into the State out of the reach of prevailing east winds and fogs. Jacksonville, or almost any other of the localities I have named, will benefit those who are troubled with a torpid liver, a disordered stomach, deranged howels, sore throat or cough, but for those whose lungs are diseased a more southern

oint is carnestly recommended. For fiften years prior to 1809, I was pro-fessionally in New York, Boston, Baltimore and Philadelphia every week, where I saw and examined on an average five hundred patients a week. A practice so extensive embracing every possible phase of lung dis case, has emplied me to understand the discase fully, and hence, my caution in regard nek's Pulmonic Syrup. It is a well resublished fact that natives of Florida rarely die of consumption, especially those of the southern part. On the other hand, in New England, one third, at least, of the population die of this terrible disease. In the Middle States it does not prevail so largely, still there are many thousands of cares there. What a vast percentage of life would be saved if connotives were as easily alarmed in regard to taking fresh cold as they are about scarlet fever, small pox. &c. But they are not. And I am afraid this is about all I knew of her when we were married. We first met in Devonshire. I was alone in a strange place. She was alone in a strange place. She was alone in a strange place. story commences.

I was young, just starting in life, and very much engrossed in my mercantile business. Neither was I a particularly demonstrative man; and as Lacy was very quiet and composed in mind, I think we hardly appeared like newly-married

people.

I had all confidence in my wife. It was her neatness, frugality, and good judgment that won me, as well as her beauty. All home affairs—the hiring of servants, the domestic arrangements, household bills-I left entirely to her management. It was a great rest to have my counting-house, and turn homeward, for I was sure of finding everything right. If Lucy had any annoyaners, she never confessed them to me; and I never took home my business-troubles.

At I will we had been my rigid a very large of the money my self for the cambric dresses. I knew you needed every shilling in your business. I had to rewrite this letter for my romance," she continued; "and I didn't get it quite the same," extook home my business-troubles.

As I said, we had been married a year.

when one evening, I came home as usual. It had been a fine day, but, as I left the train, a great drop of rain splashed on my nose. I had ten minutes walk be-fore me, and commenced the task rather

The rain came down smartly as I reached my garden-gate. As I entered the stiting-room, I found Lucy hurriedly putting away some papers.

The rain is blowing up from the west.
You had better shut the parlor windows,

Lucy," I said.
"Yes, Will" she replied, absently, rummaging in a drawer. The storm struck sharply against the pane. She went and shut the parlor windows, and then came back to the

When she had looked the drawer through, she overlooked the table, and finally went to the escritoire.
"What are you hunting for, Lacy?"

Never mind," she said, carelessly;

"dinner is ready. Will."
We went to the dining room. She chatted of her garden, and the incidents of the day. She had planted mignemette under the windows, that its fragrance at all. Our sympathies were soon might come to her as she was working, arrayed on the side of Louisville she said. The Misses Granger had called, and the man had been to graft the pear trees. Pleasant, ordinary talk, that suggested nothing of the mystery to

A few steps distance, under the gar-den wall, lay a sheet of paper. It look-ed like something that should not have been there, and I went and picked it up. It was a single square sheet of unraled paper, and the handwriting upon it was paper, and the handwriting upon it was my wife's. As I looked at it, a word here and there caught my eye. With arrested attention, I commenced a care-ful examination of the sheet. With some difficulty I read as follows:

"My dearest Percy.--Your entreaties, and my own heart, will no longer allow me to remain silent. My beloved. I am so miserable! These rangesine access or yours when I to every next hand he gare the only brightness which illumines kings. my dark day. My life is almost incur-portable. Well, he is my husband now, and I try to be a good wife; but this existence is like some dreadful nightmare dream. Percy. It does not seem as if it could be me who name. I am so desolate and depressed—so despairing! I have the feeling. Only when your letters come. I alive. I feel that you love me; and I

But, to-night, it seems almost as if I dared escape to you. Freedom, love, happiness—oh, may it still be mine! Ber fore long, I will grant you an interview. I will promise you nothing more than that now. Percy, my only love, heaven bless and keep you until we meet!

"One word more. Pray be cautious. If my husband should discover this cor-

respondence, I cannot answer for the consequences. Though he has never ill-treated me. I know him to be a hard man. But let me hear from you soon.

The name was illegible, for the sheet was much discolored and blotted by the rain. But it was Lucy's fine, delicate chirography; and I felt as if a thunder-boalt had broken around me. After a moment's blank bewilderment,

and strange, bewildering pain, I put the sheet in my pocket, and quietic continued my way. Such a flood of emotion get fair play, and got off at the next

Lesson of the Water-Mill. Listen to the water-mill Through the live-long day,
How the clinking of its wheel
Wears the hours away.
Languidly the Autumn wind
Stirs the greenwood leaves; From the fields the reapers sing, Binding up the sheaves; And a proverb haunts my mind As a spell is cast: "The mill cannot grind With the water that, is past."

Autumn winds revive no more Leaves that once are shed; And the sickle cannot reap Corn once gathered.
And the ruffled stream flows on, Tranquill, deep, and still, Nover gliding back again To the water-mill Truly speaks the proverbold,
With a meaning vast:
"The mill cannot grind
With the water that is past.

Take the lesson to thyself, Loving heart, and true! Golden years are fleeting by; Youth is passing, too. Learn to make the most of life, Lose no holy day; Time will never bring thee back Chances swept away. Leave no tender word unsaid. Love while love shall last: "The mill cannot grind With the water that is past."

Work while yet the daylight shines, Man of strength and will! Never does the streamlet glide Useless by the mill. Wait not till to-morrow's sun Beams upon thy way; All that thou canst call thine own Lies in thy "to-day." Power and intellect and health May not always last; The mill cannot grind With the water that is past.' Oh, the wasted hours of life,

That have drifted by! Oh, the good that might have been, Lost without a sigh! Love that we might once have saved By a single word; Perishing unheard. Take the proverb to thine heart, Take and hold it fast: The mill cannot grind

With the water that is past."

The streets of Selma yesterday presented a scene without a parallel even since the commencement of the reconwas under the control of a mob of infuriated black demons, and lawlessness and crime held high carnival. The mob at one time numbered perhaps five or six hundred, and it threatenes the peace of the entire community. Fortunately for all the affair terminsted without further bloodshed. We have no reliable understanding as to the cause of the difficulty between Baxter and the negro that lead to the homicide, but it is stated that the negro had been seeking the whole day to have a difficulty with Baxter. Unfortunately for him, Baxter, and the community, it occurred

with the results stated. We have never, since our residence in Selma, witnessed such scenes as took place on yesterday, and we pray God we may be spared a repetition of them.

The ringleaders and inciters of the mob who wrested Baxter from the hands of the officers of the law must be arrested and he brought to justice, and it behooves the city authorities to take more officerive measures to preserve the peace, or we may have, at no distant day, to record a bloody massacre. It is due to the forbearance of the white people that these scoundreds be punished. They can be found if proper efforts are made.

Smith's Tonic Syrup! FOR THE CURE OF ARDE AND FEVER. OR CHILLS AND FEVER.

THE proprietor of this celebrated medicence justly claims for it a superiority over all remedies ever offered to the public for the safe certain expectly and permanent cure of Ague and fever, or Chills and Fever whether of short or long standing, lie refers to the entire Western and South western country to bear him testimony to the truth of the assertion that in no case whatever will it fail to cure. If the directions are stricty followed and carried out. In a great many cases a single dose has been sufficent for a cure, and whole families have been cured by a single botte, with a perfect restoration of the general health It is however product, and in every case more certain to cure if its use is continued in difficult & founstanding cases. Usually, this medicine will not require any aid to keep the bowels in good order; should the patient however, require a cuthartic medicine, after having taken three or four doses of the Tonic, a single dose of Bull's Vegetable Family Pills will be sufficient DR. I see an editorial headed, "Congratulatory and Advisory," that article you suggest the proper ground to be assumed and course of action to be adopted by the victors in the late election in Alabama. A brave and noble people, will not abuse, insult and rob a fallen antagonist. No Forbearance and mercy predominate in the bosom of the truly noble and generous in their deportment towards a vanquished foe. True, the Radicals in their treatment of the South since the surrender have not manifested the emobling traits of character

above suggested. On the contrary, they have evinced a disposition and adopted a course of action shocking to humanity and disgraceful to the age and country in which they live. "When the wicked rule the people mourn." Again. "Righteousness exalteth a nation, but sin is a reproach to any people." How forcibly is the truth of these quotations illustrated by the iniquitous course persued by the Radicals. Truly may it be said that all Radicals. Truly may it be said that all it was designed to substitute the road parallel for the population, first in a political—afterwards Commandant, the Chief of Police, the in a material sense—by a Radical broad course of action persisted in by the Radical inferior character. For The St. Louis Republican says that to day there is not a disfranchised voter in Missouri. The fotters which Mr. Drake and his party forged in 1865 and 1865, and placed on a number of the people larger than Mr. Drake's whole party in the State, fell from the limbs of the victims on Tuesday last. Fully 70, our voters are ready to be gelded to the number heretofore credited to the State.

The agent at Lake City, when asked about it said the engine was

> but was certainly crazy! Futher west a gentleman saw an engine pass, but could discover no one on her, and said he was very much alarmed, but present he saw a hand go up and then he knew: there was some kind of a human on board. Drew thundered along until he reached Ellaville, where he came near coliding with an eastward bound freight train. The master machinist Mr. Kennedy, happened to be here, and ejecting the maniac engineer from the engine took charge of it him-elf.

Fortunately for Tulen, he found another engine at Sanderson, with which he came through to Ellaville. At or near Olustee the body of a man was discovered lying on track too late to prevent the train from passing over it and crushing it to pieces The body proved to be that of Mr. Brannon, who, when laast seen was wending his way homeward with a sack of flour on his shoulder .-The front of Drew's engine is said to have been covered with flour and it is though he must have run over Brannon, but how the body got back on the track in the position it was prisoners of war. Bismarck demands to probate with last will and testament when run over the second time, is a surrender of these forty Captains and of the said John R Clark, deceased: mystery not yet solved.

Drew was promptly discharged by the officials here, and has left for parts to us nuknown.

A CURIOSITY.-Mr. David B. Johnson informs us that he caught in the woods near his house eight miles west of this place, a white rabbit, with red cars and grey tail. It is still living, eats and seems to be doing well.

We have been shown a specimen of beautiful, clear syrup, manufactured the Fall by J. V. Rhodes, Est., who resides near Davis Town in this county. This syrup was made in one of Harris' Evaporators and patent Refiners, purchased in Nashville; and we were surprised to learn that it would make from 70 to 75 gallons per day.

cured in such great numbers in almost every section of the country, that the public scarcely need
to be informed of its virtues or uses.

Scrofulous poison is one of the most destructive enemies of our race. Often, this mesen and
unfelt tenant of the organism undermines the constitution, and invites the attack of enfeebling or fatal diseases, without exciting a suspicion of its
presence. Again, it scenas to breed infection
throughout the body, and then, on some favorable
occasion, rapidly develop into one or other of its
hideous forms, either on the surface or among the
vitals. In the latter, tubercles may be suddenly
deposited in the langs or heart, or tumors formed
in the liver, or it shows its presence by craptions
on the skin, or foul ulcerations on some part of
the body. Hence the occasional use of a bottle
of this Sursaparith is advisable, even when no
active symptoms of disease appear. Persons affitted with the following compliants generally
find immediate relief, and, at length, cure, by the
use of this SARSIPARILLET St. Authonay's Fire, Rose or Engaipeas, Fetter, Salt

Dr. SCHENCK advises Consumptives to go to Florida in Winter. tives to go to Florida in Winter.

Having for the last thirty-five years devoted my whole time and attention to the study of lung diseases and consumption, I feet that I understand fully the course that ought to be pursued to restore a tolerably bad case of diseased lungs to healthy soundness. The first and most important step is for the patient to avoid taking cold, and the best of all places on this continent for this parpose in winter, is Florida well down in the State, where the temperature is regular, and not subject to such variations as in more Northern latitudes, Palatka is a point I can recommend. A good hotel is kept there by Peterman. Last winter I saw several persons there whose lungs had been badly diseased, but who, under the healing influence of the climate and my medicines, were getting well. ting well. ting well.

One hundred miles further down the river is a point which I would prefer to Palatka, as the temperature is more even and the air dry and bracing. Mellonville and Enterprise are located there. I should give a decided preference to Mellonville. It is two miles from river or lake a well it means about

cided preterence to Mellonville. It is two miles from river or lake, and it seems almost impossible to take cold there. The tables in Florida might be better, and patients complain at times but that is a good sign, as it indicates a return of appetite, and when this is the case they generally increase in flesh, and then the lungs must head.

Jacksonville, Hibernia, Green Cove, and many other places in various parts of Florida, can be safely recommended to consumptives in winter. My reasons for saying so are that patients are less liable to take cold there than where there is a less even temperature, and it is not necessary to say that where a consumptive person exposes himself to frequent colds he is extain to die shortly. Therefore my advize is, go well down into the State out of the reach of prevailing east winds and togs. Jacksenville, or almost any other of the localities is have named, will benefit those who are troubled with a torpid benefit those who are troubled with a torpid liver, a disorder of stomach, deranged howe-cles, sore throat or cough, but for those whose lungs are diseased a more southern

whose lungs are discussed a more southern point is earnestly recommended.

For fifteen years prior to 1369, I was professionally in New York, Roston, Battimore and Phitadelphin every week, where I saw and examined on an average five hundred patients a week. A practice so extensive, embracing every possible phase of lung discusse, has chaose i me to understand the discusse fully, and hence, my continuing take vasito taking cold. A person may take vasit case they, and nence, my contion in regard to taking cold. A person may take vast quantities of "Schenek's Puimonic Syrup, Scaweed Tonic and Mandrake Pitls." and yet die if he does not avoid taking cold. In Florida, nearly everybody is using Schenek's Medicines, e-pechady Schenek's Mandrake Pitls, for the clineate is more likethat natives of Florida rarely die of consumption, especially those of the southern part. On the other hand, in New England, one third, at least, of the population die of this terrible disease. In the Middle States it does not prevail so largely, still there are many thousands of cases there. What a vast percentage at this world has award it as percentage or life would be saved if con-sumptives were as easily abarmed in regard to taking fresh cold as they are about scarlet fixer, small pax. &c. But they are not. They take what they term a fittle cold, which they are credulous enough to believe will wear aff in a few days. They pay no attention to it, and bette it lays the foundation for another and another still, until the lungs are diseased beyond all hope for cure. My advice to persons whose litings are affected even slightly is, to buy in a stock of Schenek's Puimonic Syrup, Schenek's Seawerd Toric and Schenek's Mandrake Pills and go to Fiorida. I recommend these par-ticular medicines because I am thoroughly acquainted with their action. I know that where they are u ed in strict accordance with my directions they will do the work that is required. This accomplished, nature will do the rest. The physician who precribes for cold, cough or in his weats and then ad-

vises the patient to walk or ride out every day, will be sure to have a corpse on his hands before long.

My plan is to give my three medicines, in

supplities or Friedment and Mercurial Diseases are curred by it, though a long line is required for subduing these obstaints maladies by
any medicine. But long-continued use of this
medicine will cure the complaint. Leavershad

ROBERT E. LEE. [Obiit 12 October, 1870.] BY A. R. WATSON.

Voiceless our woe and passionless And tenter, for we feel the blow, Fire-armoured, crushing us so low We cannot rise through our distress; But matter softly as we go. Like one who sacks his ifeast mind

For thought it held awhile ago Which vanished. Ah, the bitter blow! Our both and love are almost blind With auger to be smitten so. We only ask a little room To lay our hero down, and this, Old world, let us not ask amiss

We give, in pay, his high renown. Which tells you what true greatness is A little room to lay him down-'Two 'ld make the very burdscape fair To know his dust is resting there— White, radiant 'neath his hero crown

The very earth must needs be proud To womb such greatness. It is best To leave him to immortal rest; And tender hands should wind his shroud Who low is fame's immortal guest.

He giorifies the cross we bear.

rily we exclaim, "Bicased Jesus | Hal-lelajan! God with us!". No longer is there any question about His interest in children. Now we come

nearer, fathoning the depth of that wonderful revelation he makes to us when he says of them, "Their angels do always behold the face of my Father in For many years have I been pleading

for the children. I have felt that they were the hope of the church. I am comparatively a young man, but I have seen children grow up around me to manhood. Many who attended my Sunday school fifteen and eighteen years ago are now fathers and mothers, bringing their own offspring to fill the places they occupied then.

I remember hearing a brother minister tell of a visic to a church that was blessed with a revival. He had heard that twelve or fifteen souls had been converted, and he said when he entered the church he turned to the preacher that had been laboring there during the most-ing and asked him where his converts were "he pointed out a tot of children. Those children are now grown up, and if they were properly nursed are a blessing

The main object of Sunday school labor should be to get the chadren con-verted and to train them for God, and a thorough instruction in the Bible is ope of the best means of accomplishing this object. The entrance of God's Word giveth light. I have found that nothing interests children more than facts from about them, because Ghd is in them.

I am satisfied that the great majority of writers of Sunday school books are making a sad mistake. They think to get the attention of children and secure their interest they must write novels for them. Some imaginary boy or garllame, blind or destitute-is represented, in a very natural way, I grant, as per-forming feats that but few in this life Blinded ever susceed in accomplishing. Having for the last thirty-five years devoted my whole time and attention to the study of lung diseases and consumption, I feel that I understand fully the course that ought to be pursued to restore a tolerably bad case of diseased lungs to healthy soundness. The first area most important step is for the particular to the pursued to restore a tolerably bad case of diseased lungs to healthy soundness. The first area most important step is for the particular to a subject to see this continent for this purpose in winter, is Florida, well down in the State, where the temperature is regular, and not subject to see that todes, Palatka is a point I can recommend. A good loted is kept there by Peterman. Last whiter I saw several persons there whose lungs had been badly diseased, but who, under the healing influence of the climate and my medicines, were getof the climate and my medicines, were getting well.
One hundred miles further down the river

is a point which I would prefer to Palatka,

as the temperature is more even and the sir-dry and bracing. Mellouville and Enter-prise are located there. I should give a derise are incent tiere. I smooth give a con-cided preference to Mellonville. It is two miles from river or take, and it seems almost impossible to take cold there. The tables in Florida might be batter, and patients com-plain at times but that is a good sign, as it indicates a return of appetite, and when this is the case they generally increase in-flesh, and then the lungs must heal. Incksonville, Hibernia, Green Cove, and many other places in various parts of Flori-da, can be safely recommended to consump-tives in winter. My reasons for saying 20 are that patients are less liable to take colda-there than where there is a less even tempera-ture, and it is not necessary to say that where a consumptive person exposes himself to frequent colds be is extain to die shortly. Therefore my advice is, go well down into a the State out of the reach of prevailing east are that patients are less liable, to take coldwhats and logs. whose lungs are discussed in more southern point is earnestly recommended.
For titteen years prior to 1869, I was professionally in New York, Beston, Baltimore and Phandelphia every week, where I saw and examined on an average five hundred patients a work. It may well established for that natives, of Florida raccy, die of cost sumption espacially those of the southern part. On the other hand, in New England, one third, at least, of the population die of its terrible risease. In the Middle States it does not prevail so largely, still there are many thourands of cases there. What a vast percentage of the would be saved if con-sumptives were as easily alarmed in regard to taking fresh cold as they are about scalet fever, small pox. Sec. But they see not. They take what they term a little cold, which they are creditions enough to believe will wear off in a few days. They pay no as-tention to it, and hence it bays the founda-tion for another and monther still, until the longs are discussed boyond all hope for care. My advice to persons whose longs are af-fected even slighely is, to lay in a stock of Schouch's Printague Sysan, School Co. Schenek's Purmonic Syrap Schenek's Se. weed Tonic and Schenek's Mandrake Fit 4 and go to Fforiba. I recommend these preticalm madarnes because I am thorography acquainted with their action. A lad named Willie Goodman, aged ten years, residing on Columbia street, like every other boy in the kite-flying period of his existence, became ambitious to make a monster kite that should for higher than any other that ever to make a monster kite that should fly higher than any other that ever was made. Accordingly he made one with wings, such as may be seen in any toy-shop windows. It was built after the style of a "Japanese kite," and was fully six feet in length. The stout frame work was covered with paper in a very artistic manner, and a strong hempen cord manner, and a strong hempen cord was attached to the cross beams.
